

EarthRanger 2.8.1 Release Notes

September, 2020

ENHANCEMENTS

Report Count – The Report Feed now displays the number of reports in the current feed. Note this will reflect any filters that are currently active.

Report Feed Layout – The Layout of the Report Feed has been modified to more efficiently display the list of reports and include more reports in the feed

FIXES

Map Marker Report – Fixed an issue that was not displaying a new report icon when it was created from Map Marker or Ruler tools

New Incident Creation – Fixed a bug that was showing pink stripes on the screen and not allowing user to finish the incident creation

Mic Activity – Fixed an issue that was displaying “Invalid Date” when a radio has never reported

FIRMS Lag – Fixed a lag that sometimes occurred in the reporting of FIRMS Fire reports

Admin – Spatial File Import of invalid geometry handled better

Admin – Final migration of all sites to Maps v2 Admin support

Admin – The ordering of Event Categories now correctly supports the OrderNum parameter allowing the explicit ordering of categories on the User Interface
