

EarthRanger 2.19.1 Release Notes

March 2021

IMPROVEMENTS

Patrol Card Readability – Improved the font size on Patrol Cards to make them more readable on most computers.

FIXES

Patrol Status – Corrected the display of Patrol status to make it more consistent and easy to understand.

White Page on Subject Click – Fixed an issue which was displaying a white page after clicking on a radio that was inactive.

Patrol Track Display and Duration Calculation – Fixed an issue in which a portion of the patrol would sometimes not be displayed on the map and would not calculate the duration correctly.

Patrol Duration – Corrected an edge case in which the patrol duration was showing the incorrect distance for a track that was just starting.

Patrol Mapping – Improved the location and zoom on the map when jumping to the location of a patrol.

Admin – Silence Notification Threshold – The Admin was not correctly noticing changes to the Silence Notification Threshold parameter in Source Provider screen.
